# DIB Guide: Detecting Agile BS

Version 0.4, last modified 3 Oct 2018  
Department of Defense  
OFFICE OF PREPUBLICATION AND SECURITY REVIEW

Agile is a buzzword of software development, and so all DoD software development projects are, almost by default, now declared to be “agile.” The purpose of this document is to provide guidance to DoD program executives and acquisition professionals on how to detect software projects that are really using agile development versus those that are simply waterfall or spiral development in agile clothing (“agile-scrum-fall”).

## Principles, Values, and Tools

Experts and devotees profess certain key “values” to characterize the culture and approach of agile development. In its work, the DIB has developed its own guiding maxims that roughly map to these true agile values:

Agile value	DIB maxim
Individuals and interactions over processes and tools	“Competence trumps process”
Working software over comprehensive documentation	“Minimize time from program launch to deployment of simplest useful functionality”

**IF A SYSTEM AT EQUILIBRIUM  
EXPERIENCES CHANGE**

...

**WILL SHIFT IN ORDER TO  
MINIMISE THAT CHANGE**

♀ → **HENRI LOUIS LE CHATELIER, 19TH CENTURY**

**[A LARGE SYSTEM] ...  
TENDS TO OPPOSE  
IT'S OWN PROPER FUNCTION  
♀ → LE CHATELIER'S, SYSTEMANTICS VERSION**

# SCRUM MASTER JOB POST..

- » To deliver digital functionality on time and to expected cost and quality, utilising agile and waterfall methodologies
- » To take prime responsibility for ensuring that matrix resources work effectively together
- » Manage the project workstream budget monitoring the expenditure and costs and ensuring work orders are fully recovered.

# **RATHER THAN A FRONTAL ASSAULT ON AGILE, 'EMBRACE AND EXTEND' MARKETING STRATEGY**

TO KEEP WHITEHALL,  
PARLIAMENT AND OTHER  
CRITICS FROM THEIR PROJECT**

♀ **THE HERETIC'S GUIDE TO BEST PRACTICES, CULMSEE AND AWATI**

# DOD KEY FLAGS

- » Nobody on the software development team is observing the users in action
- » Continuous feedback from users not available
- » Meeting requirements more important than getting something useful into the field as quickly as possible
- » Manual processes tolerated when such processes can and should be automated

**FEEDBACK LOOPS  
REMOVE  
"AGILE BS"**

# Why the FBI Can't Build a Case Management System

Jerome W. Israel

A review of the problems that haunted the FBI's Virtual Case File and Sentinel case management programs and an examination of the technical reasons for these failures provide the basis for recommendations to help avoid their repetition.

**A £75M “AGILE” BBC IT  
PROJECT HAS EVADED  
SCRUTINY BECAUSE  
MANAGERS COULD MAKE  
UP THE BENEFITS AS  
THEY WENT ALONG...**

**A LOOP WITHOUT  
FEEDBACK IS JUST  
RUNNING IN  
CIRCLES!**

# HOW DO SUCCESSFUL ORGS SCALE?

- » start somewhere simple that kind-of-works
- » question and honestly evaluate current state
- » adjust until it stops hurting
- » high degree of automation supporting feedback
- » repeat

**HOW FREQUENTLY DO YOU OBSERVE  
ACTUAL USERS WORKING WITH YOUR  
SOFTWARE?  
[INSTAPOLL.ME/1049](https://instapoll.me/1049)**

# SMAL: 4 KEY STEPS

- » Simple start that kind-of-works
- » Measure the “error”
- » Act to reduce it
- » Loop

# SMALL: 4 KEY STEPS

- » Simple start that kind-of-works
- » Measure the “error”
- » Act to reduce it
- » Loop faster

# CREATE A MEANINGFUL GOAL FOR IMPROVEMENT

- » cost per business transaction
- » number of cases per day
- » flow/throughput
- » cycle time
